-

In claim 3, change the dependency from claim 2 ~~to~~ claim 1.

In claim 5, change the dependency from claim 2 to claim 1.

In claim 7, change the dependency from claim 2 to claim 1.

16
17. (Amended) A medicament-dispensing apparatus for filling a prescription for a medicament including a designated amount of the medicament, said apparatus comprising:

W2

- a prescription database including prescription data corresponding to a prescription to be filled including the medicament thereof;
- a computer including means for accessing said prescription database for retrieving prescription data therefrom corresponding to the prescription to be filled;
- a printer coupled with said computer and operable to print a prescription label representative of the prescription; [and]
- an indicia-reading device coupled with said computer and operable to read container indicia on a supply container of a medicament, said container data being representative of the medicament contained in the container, said device being operable to provide said container data to said computer,

said computer including means for comparing said container data and said prescription data to determine a match therebetween and in response, prompting said printer to print the prescription label[.]; and

a2
amended

an attribute database including attribute data representative of at least one physical attribute of the medicament, said computer including means for accessing said attribute database and for retrieving attribute data therefrom corresponding to the prescription medicament and for activating said printer to print the prescription label with medicament indicia thereon representative of at least one physical attribute of the prescription medicament.

In claim 20, change the dependency from claim 19 to claim 17.

In claim 21, change the dependency from claim 19 to claim 17.

In claim 23, change the dependency from claim 19 to claim 17.

In claim 24, change the dependency from claim 19 to claim 17.

a3

29. (Amended) A method of filling a prescription for a medicament including a designated amount of the medicament, said method comprising:

- (a) receiving prescription data into a computer corresponding to a prescription to be filled, the prescription data including data representative of the prescription medicament;
- (b) in said computer, retrieving attribute data including a word description of the medicament from an attribute database, said attribute data being representative of at least one physical attribute of the prescription medicament;
- (c) printing a prescription label with prescription data thereon representative of the prescription and with medicament indicia corresponding to said attribute data.

a4

31
34. (Amended) A medicament-dispensing apparatus for filling a prescription for a medicament including a designated amount of the medicament, said apparatus comprising:

Handwritten: *Amended*

a attribute database including attribute data corresponding to at least one physical attribute of the prescription medicament of a prescription to be filled, said attribute data including a word description of the medicament;

a computer including means for accessing said attribute database for retrieving attribute data therefrom corresponding to the prescription to be filled; and

a printer coupled with said computer and operable to print a prescription label representative of the prescription,

said computer including means for activating said printer and print a prescription label with medicament indicia thereon corresponding to said attribute data.

Handwritten: *35 36*

~~35~~ 40. (Amended) A prescription-filling apparatus for filling a prescription for a medicament including a designated amount of the medicament, said apparatus comprising:

Handwritten: *Ab*

a language database including language data corresponding to the prescription in a second language;

a computer including means for accessing said language database for retrieving language data therefrom corresponding to the prescription to be filled; and

a printer coupled with said computer and operable to print a prescription label representative of the prescription,

said computer including means for activating said printer to print a prescription label with prescription data thereon corresponding to said second language[.], said computer further includes means for activating said printer to print a first prescription label in a first language and a second prescription label in said second language.

REMARKS:

Status Of Claims

Claims 2, 19, 30, 35, 42, 43, and 44 have been cancelled, claims 1, 3, 5, 7, 17, 20, 21, 23, 24, 29, 34, 40 have been amended, and claims 4, 6, 8-16, 18, 22, 25-28, 31-33, 36-39, and 41 are unchanged. Thus, claims 1, 3-18, 20-29, 31-34, and 36-41 are currently pending in the application with claims 1, 17, 29, 34, and 40 being independent.
